

SureFlow[®] Systems Fan Coils

SureFlow[™]

200 CFM TO 2000 CFM

- Easy System Design
- Saves Money
- Plug and Play Simple
- Fewer Moving Parts
- Cost Efficient Operation

SureFlow® Systems

FAN COILS

Fast and Easy System Design

SureFlow Design Software simplifies and automates the selection and rating of equipment in your project.

Saves Money

SureFlow Systems provide 4-pipe performance with 2 installed pipes or 2-pipe performance with 1 installed pipe. Installed piping cost and labor are reduced by up to 40 percent which benefits both new construction and renovation projects.

Plug and Play Simple

SureFlow Systems are contractor friendly since they are easy to install and are self-balancing, reducing construction cost and time.

Fewer Moving Parts

Zone controls along with their springs and gears, as well as water balancing valves and test ports are eliminated, thereby reducing the owner's cost of maintenance.

Cost Efficient Operation

SureFlow Systems are inherently more energy efficient than conventional hydronic designs. Central pump horsepower is greatly reduced resulting in a lower cost of operation for the owner.

SureFlow™
