IEC Skyport Web App

For set up, system/location control

Ideal For: building owners, facilities management, contractors

- Set up locations to group thermostats
- Add and control multiple thermostats
- Establish general settings, alerts, permission control and more
- Adjust temperature
- Set schedules

IEC Skyport Web App

Global Changes

- Push changes globally to all selected thermostats
  - Temperature
  - Mode
  - Time period schedules
  - Holidays
- Create system profiles for quick thermostat configuration
- Create viewing/control permissions for other Skyport users
