Venture Wi-Fi Thermostat
Powered by Skyport

Introducing the Venture Wi-Fi Thermostat with Skyport

The Venture Thermostat powered by Skyport makes it possible to manage and optimize a virtually endless number of fan coil products. IEC's advanced Skyport web portal and mobile app put the power and convenience of enterprise-wide climate control right at your fingertips. By monitoring system performance to maximize efficiency, you can easily realize substantial energy savings as well.

Key Features and Benefits

Global System Control

The Venture Thermostat with Skyport allows for easy control of a virtually unlimited number of thermostats across your locations from virtually anywhere.

Free Web and Mobile Connectivity

Using IEC's advanced Skyport web portal and mobile app, it's easy to access and manage all of your Venture Thermostats wherever they are — with no monthly fee.

Seamless BMS Integration

The Venture Thermostat is designed to connect with legacy building management systems, giving you the capability to control equipment globally without a heavy investment.

Nonstop Connections

The Venture Wi-Fi Thermostat allows you to connect and group a virtually endless number of thermostats, making it easy to control all of your HVAC systems.

Easy Setup

With the Configurator App available from IEC, connecting the Venture Thermostat to Wi-Fi and establish system profiles is simple and quick.

Web and Mobile Access

With a free Skyport web portal and mobile app, accessing and managing your Venture Thermostats couldn't be any easier or more convenient.

Retrofit Installation

The Venture Thermostat requires minimal wiring, making it effortless to get up and running quickly.

Two- or Four-Pipe Operation

The flexibility to work with either two- or four-pipe configurations means the Venture Thermostat is suitable for a wide range of applications including renovations.

Seven-Day Programmability

Save on heating and cooling costs by adjusting temperatures based on when buildings are occupied.

Continuous Energy Monitoring

Using either the web portal or the mobile app, you can keep an eye on your energy usage and adjust as necessary to reduce consumption.

Endless Optimization

With the Venture Thermostat with Skyport, you can adjust thermostats in multiple spaces when not being occupied without ever touching the thermostat.

More Features

- Wi-Fi enabled
- Free IEC Skyport web portal and mobile app
- Light BMS capability without the heavy investment
- Local API for third party monitoring and control
- Retrofit application - minimal wiring required
- Free IEC Configurator App for Wi-Fi set up
- IEC Service option configures the customer Skyport account
- 2 or 4 pipe system

- Auto changeover
- 3 speed fan control
- Condensate and other alert options available
- Staged cooling for active dehumidifcation
- 7-day programmable
- Monitor energy use from mobile app or actively manage energy use adjustments via web app
- Open ADR2.0
- Title 24 compliant
