# Venture Wi-Fi Thermostat

IEC's new Wi-Fi enabled Thermostat is the thermostat controls solution for your next job.

Learn why!

The Venture Wi-Fi thermostat introduces modern functionality and mobile apps to meet the demands of today's users.

The Power of IEC Skyport

Utilize the Skyport web portal and mobile app for remote monitoring and control of your Venture thermostats.

- **Save time and program all your thermostats at once with the Global Changes feature**
  - Eliminate manually programming each thermostat individually!
- **Have more than 16 rooms to control? No Problem!**
  - No limits on the number of thermostats that can be added to an IEC Skyport account
- **Establish alerts for filter, condensate service and more.**
  - Receive email and in-app alerts
- **Control user permissions to each thermostat.**
  - Great for tenant changeover
- **Connect to Alexa or Google Home**

IEC Skyport Web App
- Set up locations to group thermostats
- Add and control multiple thermostats
- Establish general settings, alerts, permission control and more
- Adjust temperature
- Push changes globally to selected thermostats
- Set schedules

IEC Skyport Mobile App
Ideal for end users, condo users, multi-family residents Utilize the IEC Skyport Mobile App to remotely control your thermostat

- View current thermostat readings
- Adjust temperature
- Set schedules
- View Alerts
- Condensate switch
- Service filter

Get caught up on the power IEC Skyport with this Global Changes Tutorial

Global Changes:
- Make settings changes to a group of thermostats
- Transfer thermostats between 2 Skyport account users
