

IEC announces ISO 9001:2015 and ISO 14001:2015 certifications

International Environmental Corporation (IEC) is proud to announce certification as an ISO 9001:2015 quality management system and ISO14001:2015 environmental management system organization. With these certifications, our clients can be confident that IEC is dedicated to maintaining the highest efficiency, responsiveness and environmental considerations to achieve goals – customer satisfaction and environmental stewardship.

ISO Standards

ISO 9001:2015 is the world's best-known quality management standard and helps organizations meet the product and service expectations and needs of their customers.

ISO14001:2015 focuses on the environmental management system that an organization can use to enhance its environmental performance and achieve more sustainable business practices.

Relentless Pursuit of Excellence

As part of the ISO 9001:2015 and ISO14001:2015 certification process, IEC engaged in a rigorous audit of our business systems, product quality standards and environmental impact processes, including a pre-audit, initial assessment and final assessment, all of which work to identify process improvements.

The process culminated in a comprehensive registration audit by a third-party registrar. By achieving this level of certification we continue to demonstrate our ability and desire to effectively and efficiently operate our business with a customer focused approach while continuously improving our products, services, and internal processes.

These certifications further strengthen our commitment to our customers and our Company Quality and Environmental Policies.

"We would like to extend our sincere thanks to our customers and suppliers for their continued commitment and loyalty. With our goals focused on the emphasis of quality assurance, innovative production, and environmental sustainability, we look forward to bringing the business to new heights in the months and years to come."

– Scott Wilson, Director of Quality, International Environmental
