

Side Filter Access Option Launch

As part of our Clean Air Initiatives, IEC is proud to announce the new option for Side Filter Access in Ceiling and Hi-Performance models.

Timely filter changes are necessary to maintaining healthy indoor air quality. When fan coil units are installed in the ceiling, it may be difficult to quickly access the filters. With our addition of side filter access, users can simply rotate the tabs located on the left and right side of the filter frame to remove and change the filter.

Simply rotate the tabs on each side of the filter frame to access the filter.

Enhance Serviceability

Access panels for ceiling units are often located on the side of the unit to more easily access the control box and valve package. Adding the option to access and change filters on the side can decrease maintenance time.

Product Availability

Side Filter Access is available for the following IEC product families:

- Horizontal Ceiling - CPY*
 - Horizontal Hi-Performance - HPY*
- *Available with Rear Return, Front Supply Arrangements*

If larger filter frames are required, please contact our Applications Department.

Order Entry

Select Side Filter Access in EnCompass via the new Indoor Air Quality Section

| Ratings | |
|--------------------------------------|------------------------------------|
| Unit Type: CPY - with Plenum | Size: 600 CFM |
| System Type: 4-Pipe Hydronic Heat/ H | Coil Rows: 4/1 - 4-Row Primary/1-R |
| Unit Voltage: 277/1/60 | Motor Type: PSC Standard |
| Electric Heat KW: None | |

| Indoor Air Quality | |
|--------------------------------------|--|
