

## Side Filter Access Option Launch

As part of our Clean Air Initiatives, IEC is proud to announce the new option for Side Filter Access in Ceiling and Hi-Performance models.

Timely filter changes are necessary to maintaining healthy indoor air quality. When fan coil units are installed in the ceiling, it may be difficult to quickly access the filters. With the addition of side filter access, users can simply rotate the tabs located on the left and right side of the filter frame to remove and change the filter.

Side Filter Access

CPY Side Filter Access

Simply rotate the tabs on each side of the filter frame to access the filter.

### Application

Access panels on ceiling units are often located on the side of the unit to more easily access the control panel and electrical panel. Adding the option to access and change filters on the side can decrease maintenance time.

### Product Availability

Side Filter Access is available for the following IEC product families:

Horizontal Ceiling - CPY\*

Horizontal Hi-Performance - HPY\*

\*Available with Rear Return, Front Supply Arrangements

If larger filter frames are required, contact our Applications Department.

### Order Entry

Select Side Filter Access in Enhancements in the new Indoor Air Quality section

Ratings	
Unit Type: CPY - with Plenum	Size: 600 CFM
System Type: 4-Pipe Hydronic Heat/Hot Water	Coil Rows: 4/1 - 4-Row Primary/1-Row Secondary
Unit Voltage: 277/1/60	Motor Type: PSC Standard
Electric Heat KW: None	

Indoor Air Quality	
Air Filter: 1" Pleated (MERV 8) Filter	<input checked="" type="checkbox"/> Side Filter Access
Air Purification: BiPolar Ionizer	

We work hard to make the best Fan Coils in the Industry even better. We trust you'll find these product option enhancement an improvement and increase your ability to specify IEC products.
